

BALCLUTHA WOOLWORTHS

RL System: RL FiberthermX
Project Size: 2,500m²
Location: Balclutha
Project Date: 2022

Architect: Woodhams Meikle Zahn Architects
Contractor: Calder Stewart
Installer: Extreme Roofing

PROJECT DESCRIPTION

The local community has embraced the state-of-the-art Woolworths Balclutha store, following a year of construction. The \$18 million development marks the debut of Woolworths in the area, with Woolworths Director of Property, Matt Grainger, emphasizing the store's commitment to sustainability. The 2530m² facility is part of a comprehensive \$50 million investment initiative earmarked for Otago and Southland.

Notably, the store features a RL FiberthermX roof, incorporating R3.6 insulation across the entire roofing structure. The Rooflogic FiberthermX system delivers superior thermal performance and is also specifically engineered to address condensation risk, a critical consideration in the lower South region.

SPECIFIED ROOFLOGIC SYSTEM

RoofLogic's FiberthermX system:-

- RL TopDeck-T
- Structural Post & Rail
- Fibertherm Insulation R3.6 (150mm)
- RL LinerDeck
