

NZ POST DISTRIBUTION CENTRE

RL System: RL FiberthermX
Project Size: 10,000m²
Location: Wellington
Project Date: 2022

Architect: Archaus
Contractor: Aspec Construction Ltd
Installer: Tararua Roofing

PROJECT DESCRIPTION

The Wellington Super Depot is NZ Post's first automated processing hub in the lower North Island and the first to be built from the ground up. This is the single largest material handling investment programme within New Zealand in recent history. Sustainability was also a central consideration for the Wellington Super Depot site, alongside other new NZ Post depots across Aotearoa. All building materials and appliances have been selected with sustainability in mind. The site has thermal insulation and has been built using products with the environmental choice tick. The site has on-site storm water detention ponds and rain-water harvesting.

SPECIFIED ROOFLOGIC SYSTEM

RoofLogic's FiberthermX system:-

- RL Liner Deck
- RL Vapour Control Tape
- RL Fibertherm Insulation
- RL Structural Post and Rail
- RL TopDeck T
