

# BOULCOTT SUITES

**RL System:** Ultratherm Xtreme (FiberTite)  
**Project Size:** 500m<sup>2</sup>  
**Location:** Wellington  
**Project Date:** 2015

**Architect:** Archaus Architects  
**Installer:** SWP Commercial

## PROJECT DESCRIPTION

Boulcott Suites in Wellington were an apartment development including multiple deck and podium areas and main roof. The roof area needed to provide a high level of thermal performance and the roof/deck systems needed to be installed over a range of substrates.

The product was selected for thermal, hygrothermal, and acoustic performance. It was fully engineered to establish structural reliability. The FiberTite membrane demonstrates extreme durability, particularly in high-traffic areas. The speed of the close-in process contributed to overall efficiency.

## SPECIFIED ROOFLOGIC SYSTEM

RoofLogic's Ultratherm Xtreme (FiberTite) system:-

- RL Base Deck
- RL Vapour Control Layer
- RL PIR Board (80mm)
- RL Roof Board HD
- FiberTite Membrane
