

# DISTRIBUTION CENTRE

**RL System:** RL Recover Ultratherm Xtreme  
**Project Size:** 20,600m<sup>2</sup>  
**Location:** Christchurch  
**Project Date:** 2023

**Architect:** Client Led  
**Installer:** SWP Commercial

## PROJECT DESCRIPTION

Within two years of opening, the Distribution Centre in Christchurch faced weathertightness issues, prompting the application of the RL Recover system. Covering 20,000m<sup>2</sup> of existing roofing, the system used FiberTite membrane for its exceptional durability. RL Engineers carefully designed the RL Ultratherm Xtreme Recover system to ensure structural stability, providing a comprehensive solution to the initial weathertightness concerns faced by the building.
